## ABOUT ME

A lifelong learner and committed person. Entry-level to web development. Able to use Python programming language for data analysis. Familiar with HTML and CSS. Familiar with Django framework. Able to use Javascript. Ability to work both individual and as a team. Willing to improve my skills emotionally, intellectually, and professionally.

## EDUCATION

### Bachelor of Economics/Universitas Indonesia (2015-2019) | GPA: 3.32/4.00

- Thesis: Impact of Organizational Identification on Job Satisfaction with Employee Engagement as Mediation on Staff at One of the Biggest University in Indonesia.

### Purwadhika Digital Technology School(Jul 2020 - Nov 2020)

- Program: Data Science Program  
Learn to use python language programming and libraries, basic SQL, tableau.  
Learn to do data wrangling, data visualization, feature engineering, build model with machine learning.
- Final Project:  
Topic of the project is about Employee Attrition. In this project, I gain insight on what factors can lead to high level of attrition and what probably can reduce the level attrition. I also build a classification model with machine learning to predict employee that have bigger chance to leave the company.
